To: Town Offices in Kennebec County; All Maine Residents
From: Tom Richmond - Installation Manager, Valley Home Services
Subject: **Affordable Heating Initiative Rebates - 2020** - Fujitsu Heat Pumps

Efficiency Maine has opened an enhanced rebate for Maine residents who utilize the LIHEAP program *or* whose current tax-assessment value of their property (home & land) is less than or equal to \$100,000.

These **rebates reduce the cost of installing an energy efficient Heat Pump System by as much as \$2000.**

As always, Valley Home Services provides rebates *instantly* to customers.

Our Heat Pump Systems can **save Maine Residents up to 50% on their heating and cooling** needs year after year, and that is why Governor Mills has signed a pledge to get 100,000 heat pumps installed in Maine homes over the next five years.

Limitations exist for this program and **it could end at any time**, so residents should **call immediately to get their free consultation and secure their rebate reservation** before funding runs out.

Valley Home Services is a 40-year-old, family-owned and operated company and the #1 Fujitsu dealer in New England. We offer a First Year Peace-Of-Mind Guarantee, 12 year warranties on all systems, and complete Maintenance and Service for our customers.

Residents and town officials should call 207-945-9008 or 1-800-316-8715 for more information and to schedule a free consultation right away.
